# Comprehensive Reports
Make MI Write
Easy to Use

Reports are the key to tracking student growth and knowing how to best use them is essential for every teacher. MI Write teachers have access to several useful reports at their fingertips to keep track of their students' progress throughout the year. They are broken down into categories (performance, prompts, usage, and progress) and each report displays a table and a graph.

Performance reports will give you a look at how well your students are scoring in each of the Six Traits of Writing and overall. This information will allow you to see where your students are excelling and where they may need additional assistance.

Class Averages: Trait and Total Scores

The report below displays the average score for each writing trait, total score, and teacher-scored textual evidence and content accuracy categories by class and by student. The averages are calculated using the score from the most recent draft of each essay. To view a detailed performance report for a specific student, click the student's name.

students are spending their time, you can better assess the effectiveness of MI Write in your classroom. Used in conjunction with the Performance reports, you will be able to understand why your students are performing the way they are.

The MI Write **Progress report** is a view of the year with class average scores drilled down by month. These scores can be affected by time spent in MI Write, the number of essays and drafts that are submitted, and the effort your students are putting into their work. This is a quick way to see the progress your students have made throughout the year.

With all the different options available, MI Write has your reporting needs covered! You are able to view, analyze, and even export and print or share any of the reports. Help your students beef up their portfolios with their personalized reports as most of the options you have as a teacher are available to individual students (with only their data, of course). Impress your admins with the usage and progress reports. Justify the need for MI Write in your classroom!
